The distinction between science, engineering, and technology is not always clear. Science is systematic knowledge of the physical or material world gained through observation and experimentation. Technologies are not usually exclusively products of science, because they have to satisfy requirements such as utility, usability, and safety. [citation needed]

Ancient Rome boasted impressive technological feats, using many advances that would be lost in the Middle Ages. These accomplishments would not be rivaled until the Modern Age. Many practical Roman innovations were adopted from earlier designs. Some of the common, earlier designs incorporated arches.
