From sectoral systems of innovation to socio-technical systems: Insights about dynamics and change from sociology and institutional theory

From sectoral systems of innovation to socio-technical

Population dynamics have been widely used in several control theory applications. With the use of evolutionary game theory, population games are broadly implemented for different industrial and daily-life contexts. Mostly used in multiple-input-multiple-output systems, although they can be adapted for use in single-input-single-output systems.. Some examples of applications are military ...

Biodiversity refers to the variety of life and its processes. It includes the variety of living organisms, the genetic differences among them, the communities and ecosystems in which they occur, and the ecological and evolutionary processes that keep them functioning, yet ever changing and adapting.
