

facial action coding system pdf

Facial Action Coding System (FACS) is a system to taxonomize human facial movements by their appearance on the face, based on a system originally developed by a Swedish anatomist named Carl-Herman Hjortsjö. It was later adopted by Paul Ekman and Wallace V. Friesen, and published in 1978. Ekman, Friesen, and Joseph C. Hager published a significant update to FACS in 2002.

A microexpression is the innate result of a voluntary and an involuntary emotional response occurring simultaneously and conflicting with one another. This occurs when the amygdala (the emotion center of the brain) responds appropriately to the stimuli that the individual experiences and the individual wishes to conceal this specific emotion. This results in the individual very briefly ...

Une micro-expression est une expression faciale brève et involontaire que le visage humain exprime en fonction des émotions vécues. Plusieurs durées ont été avancées concernant les micro-expression telles que 1/15 à 1/25 de seconde. Toutefois, il est aujourd'hui admis que l'on parle de micro-expressions lorsqu'une expression faciale dure moins de 1/2 seconde [1].
