A sound reinforcement system is the combination of microphones, signal processors, amplifiers, and loudspeakers in enclosures all controlled by a mixing console that makes live or pre-recorded sounds louder and may also distribute those sounds to a larger or more distant audience. In many situations, a sound reinforcement system is also used to enhance or alter the sound of the sources on the ...

Story. Doing Data Science Exercises Without Data Cleaning and Coding. So as a data scientists/data journalist/information designer, who is about to teach university courses, I asked is it possible to teach an introductory level class that does not require first learning a lot about data cleaning and coding?
