Diamond (DMD) is a digital currency that puts the power back to the people by facilitating transfer of value anywhere in the world instantly, securely and at near zero cost without the need for a centralized trusted third party.

DIAMOND (DMD)

Diamond is a solid form of the element carbon with its atoms arranged in a crystal structure called diamond cubic. At room temperature and pressure, another solid form of carbon known as graphite is the chemically stable form, but diamond almost never converts to it. Diamond has the highest hardness and thermal conductivity of any natural material, properties that are utilized in major ...
