A fast, nondestructive, camera-based method to capture optical bandgap images of perovskite solar cells with micrometer-scale spatial resolution is developed. This technique allows for the probing of relative variations in optical bandgaps across various solar cells, and for the resolution of bandgap inhomogeneity within the same device due to material degradation and impurities.

Neuroplasticity, also known as brain plasticity, neuroelasticity, or neural plasticity, is the ability of the brain to change throughout an individual's life, e.g., brain activity associated with a given function can be transferred to a different location, the proportion of grey matter can change, and synapses may strengthen or weaken over time. . Research in the latter half of the 20th ...

One of the most widely used assessments of domain-general creative cognition is the alternate uses divergent thinking task. In contrast to convergent thinking tasks, which involve discovering a single solution to a creative problem (e.g., insight 6, 7), divergent thinking involves generating several possible solutions to an open-ended problem, such as inventing creative uses for common objects.

Bicycle and motorcycle dynamics is the science of the motion of bicycles and motorcycles and their components, due to the forces acting on them. Dynamics falls under a branch of physics known as classical mechanics. Bike motions of interest include balancing, steering, braking, accelerating, suspension activation, and vibration. The study of these motions began in the late 19th century and ...
