Structural health monitoring (SHM) refers to the process of implementing a damage detection and characterization strategy for engineering structures. Here damage is defined as changes to the material and/or geometric properties of a structural system, including changes to the boundary conditions and system connectivity, which adversely affect the system's performance.

Philosophical aspects. Enactivism is one of a cluster of related theories sometimes known as the 4Es. As described by Mark Rowlands, mental processes are: . Embodied involving more than the brain, including a more general involvement of bodily structures and processes.; Embedded functioning only in a related external environment.; Enacted involving not only neural processes, but also things an ...

Marxism: Structural Conflict Theory Marxism: Structural Conflict Theory 3 3 2. What Causes Social Change? Major changes according to Marx are a result of new forces of production. He used the change from Feudal society run by the noblemen, clergy, and commoners and based upon heredity. So there was little movement within the system.
