Windows Fundamentals for Legacy PCs ("WinFLP") is a thin client operating system from Microsoft, based on Windows XP Embedded and is optimized for older, less powerful hardware. It was released on July 8, 2006 and is not marketed as a full-fledged general purpose operating system, although it is functionally able to perform most of the tasks generally associated with one.

### **Online telecommunications training courses by Teracom**

A computer network, or data network, is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as WiFi. Network computer devices that originate, route and terminate the ...
