

### **gallium arsenide digital integrated pdf**

Gallium arsenide (GaAs) is a compound of the elements gallium and arsenic. It is a III-V direct bandgap semiconductor with a Zinc blende crystal structure.. Gallium arsenide is used in the manufacture of devices such as microwave frequency integrated circuits, monolithic microwave integrated circuits, infrared light-emitting diodes, laser diodes, solar cells and optical windows.

Multifunction GaAs MMIC designed for communication radar and weather applications.

### **MACOM - Core Chips**

Integrated circuits can be classified into analog, digital and mixed signal, consisting of both analog and digital signaling on the same IC.. Digital integrated circuits can contain anywhere from one to billions of logic gates, flip-flops, multiplexers, and other circuits in a few square millimeters. The small size of these circuits allows high speed, low power dissipation, and reduced ...
