Metallurgy is a domain of materials science and engineering that studies the physical and chemical behavior of metallic elements, their inter-metallic compounds, and their mixtures, which are called alloys. Metallurgy is used to separate metals from their ore. Metallurgy is also the technology of metals: the way in which science is applied to the production of metals, and the engineering of ...

Ferroalloy refers to various alloys of iron with a high proportion of one or more other elements such as manganese (Mn), aluminium (Al), or silicon (Si). They are used in the production of steels and alloys. The alloys impart distinctive qualities to steel and cast iron or serve important functions during production and are, therefore, closely associated with the iron and steel industry, the ...

We supply a broad range of Alpina wheels and accessories that are available for most BMW models. If for  
any reason the Alpina alloys you would like are not shown on the site, please email us so that we can give  
you a price to beat the competition! Please choose from the list of models above to see the selection of  
Alpina alloys for your car.

Education. Whether you want to learn shielding theory, shielding calculations, or the differences between our  
shielding alloys, we can help. We are all affected by, and becoming acutely aware, of the affects  
electromagnetic interference has on safety and compliance.
