Sustainable development is the organizing principle for meeting human development goals while at the same time sustaining the ability of natural systems to provide the natural resources and ecosystem services upon which the economy and society depend. The desired result is a state of society where living conditions and resource use continue to meet human needs without undermining the integrity ...

Sustainable development - Wikipedia

Forestry is the science and craft of creating, managing, using, conserving, and repairing forests, woodlands, and associated resources for human and environmental benefits. Forestry is practiced in plantations and natural stands. The science of forestry has elements that belong to the biological, physical, social, political and managerial sciences.

! 2 Terminology and Abbreviations Adsorption / Absorption / Sorption "Adsorption" signifies a surface interaction between dissolved species and solid material (in this case, char). This process is distinct from "absorption," which means "to soak up" or "to take into." To be exact, however, in water treatment contaminants diffuse into char pores (absorption) where they bind to char
